_____

Projects

1. Collaborative Filtering

- Made a comprehensive static website for the project. Have a look:
https://phot0n.github.io/CollabFil/

- Implemented a Collaborative Filtering based method using K- Nearest Neighbours (KNN) for Movie Recommendation.

2. Video Summarization

- Developed a fully functional Flask based web app for tracking and classifying the important events within surveillance video and managing summarized videos interactively using openCV. Check it out:
https://github.com/phot0n/sp5-VideoSummarizer

3. Ray Casting

- Made a Simple First Person Game Engine using Raycasting on Terminal using the `ncurses` library (for terminal manipulation).

- Used ascii characters to display/render the "world" making things more immersive to the player by rendering things at various distances with different ascii-characters, providing Depth in the Field of View.

_____

Experience

03/2021 - Present
1. Tafzs.com - Python Intern

- Currently working on ETL scripting, Azure and graphdb

_____

Open Source

01/2020 - 04/2020
1. Pitivi

- Pitivi is an open source video editor. It's backend is based on GES (Gstreamer editing services) and (most of) the frontend/UI is based on GTK+. To know more about the project:
http://www.pitivi.org/

- My Contributions:
https://gitlab.gnome.org/GNOME/pitivi/-/commits/master?author=ritwik

_____

Skills
- **Languages**: Python
- **Frameworks**: Flask
- **Other(s)**: Git, SQL, Linux

_____

Certifications
1. AWS Certified Cloud Practitioner
_____

Education

07/2017 - 06/2021 : (Currently Enrolled)
Bennett University, Greater Noida

- BTech in Computer Science

_____
